

ETHICAL SURROGACY in the UNITED STATES:

Learn all About the Aspects of Having a Baby Through Surrogacy in the United States

In this seminar you will learn everything you need to know about how surrogacy works in the United States

We will discuss:

- How to maximize success and minimize costs
- Who are the surrogates and why do they do this
- Managing your relationship with the surrogate
- Why you want a surrogate match customized for your needs
- The medical criteria that is used to select an ideal surrogate and egg donor
- The diagnostic testing and screening of the egg donor and surrogate
- Preimplantation Genetic Screening (PGS) of embryos
- Single vs double embryo transfer

At the end of the event, there will be ample time for questions and answers, as well as an opportunity to schedule time to meet privately with the experts.

Noted Panel of Experts:

Jessica Junyent is the Director of International Relations at Growing Generations, one of the largest surrogacy agencies in the world. She personally manages the surrogacy cases of intended parents that reside in France, Italy, and Spain, in addition to developing the company's international network of professionals. She speaks English, French, Italian, Spanish, and Catalan fluently. Jessica grew up in Barcelona and worked as an attorney for several years prior to moving to Los Angeles. Her professional background also includes years at the executive level in the entertainment industry and in real estate, where she was recruited by the Beverly Hills North Office of Coldwell Banker, the #1 office in the United States.

Said T. Daneshmand, MD, FACOG, the Practice Director at The Fertility Center of Las Vegas is sub-specialty Board Certified in Reproductive Endocrinology and Infertility. He completed his residency and fellowship training at UCLA Medical Center. After joining The Fertility Center of Las Vegas in 1999, Dr. Daneshmand was integral in establishing the region's first egg freezing program. He collaborated with his practice partner, Dr. Bruce Shapiro, to develop IVF protocols to improve pregnancy rates, including PTEC (post thaw extended culture), one of the most successful IVF regimens currently available. Their groundbreaking findings were published in the internationally respected medical journal, Fertility and Sterility, and Dr. Daneshmand has also served as a reviewer for the same publication. Additionally, Dr. Daneshmand and Dr. Shapiro's voluminous research has been presented at both national and international conferences. IVFreports.org has also recognized the Fertility Center of Las Vegas for their stellar pregnancy rates.
